of services.**

**THE CONSERVATORY  
INSULATION COMPANY**

# Internal Conservatory Roof Insulation

We can insulate your conservatory roof using high-quality multifoil insulation materials to prevent heat loss in the winter and reduce heat gain in the summer. This is a cost-effective way to improve the insulation of your conservatory and maintain a comfortable temperature throughout the year.

For the internal finish, you can choose between a UPVC finish or a plasterboard finish. Both options provide a clean and polished look to your conservatory's interior. Additionally, you can opt to have spotlights installed to enhance the lighting in your conservatory.

Internal PVC Finish

This internal insulation solution is a short to medium-term option that provides immediate benefits in terms of temperature control and energy efficiency. It is a cost-effective alternative to more extensive roofing or solid roof replacements.

Internal Plasterboard Finish

# Solid Tiled Roof Replacement

During the solid tile roof replacement process using your existing frame, we will remove the existing panels and insulate from the inside. We will replace the panels with insulation and add a new tiled roof, ensuring that your conservatory is well-insulated and energy-efficient.

To enhance the functionality and aesthetics of your conservatory, we also install new guttering, new flashing, roof lights, and external lighting. These additions are optional and can be customized to suit your specific needs and preferences.

For the internal finish, you can choose between a plaster-board finish and skim or UPVC cladding. Both options provide a clean and polished look to your conservatory's interior.

# Solid Roof Replacement

During the solid roof replacement process, we will remove your old roof and replace it with a new timber frame or aluminium frame, depending on your preferences. The new roof will be insulated to meet building standards, both internally and externally, ensuring that your conservatory is energy-efficient and comfortable.

For the internal finish, you can choose between a plasterboard finish and skim or UPVC cladding. Both options provide a clean and polished look to your conservatory's interior.

To enhance the functionality and aesthetics of your conservatory, we can also install internal lighting, new guttering, new flashing, roof lights, and external lighting. These additions are optional and can be customized to suit your specific needs and preferences.

# EPDM Rubber Roofing

**Our company specializes in EPDM rubber roofing, which is a cost-effective alternative to a tiled roof. This type of roofing is particularly suitable when the pitch of a tiled roof is not feasible. We can install EPDM rubber roofing with or without roof lights, depending on your preferences and requirements.**

**To ensure compliance with building regulations, we also provide insulation services for your roof. This will help maintain a comfortable temperature inside your conservatory and reduce energy consumption.**

EPDM Rubber Roof without Skylight

**After the roofing installation, we offer two options for the internal finish. You can choose between a plasterboard finish and skim or an UPVC finish. Both options provide a clean and polished look to your conservatory's interior.**

EPDM Rubber Roof with Skylight

**In addition to the insulation and roofing services mentioned above, we also offer the supply and installation of new glass, windows, and doors. Whether you need replacements or upgrades, we can provide and fit these products to enhance the functionality and aesthetics of your conservatory.**

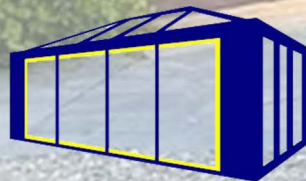

**Our team of experienced professionals will work closely with you to understand your specific requirements and provide tailored solutions to improve the energy efficiency and comfort of your conservatory.**
