Modern Steel SIP Extensions by **TCIC** Living

Beautifully designed, expertly built extensions that
create more space, more light and more possibilities.

Delivered with the speed and efficiency of
modern Steel SIP construction.

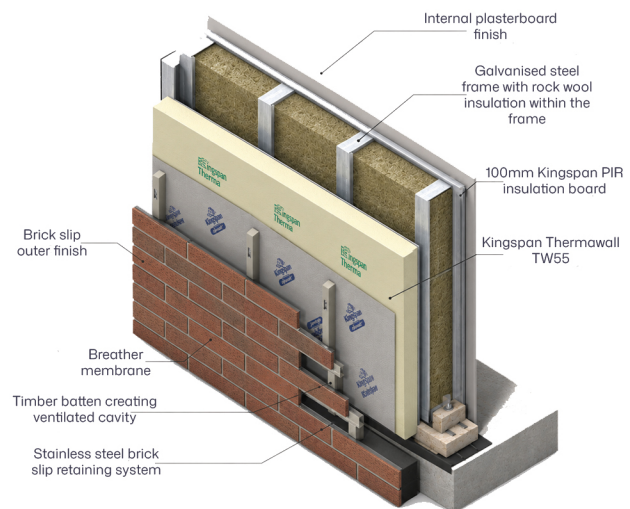

Fast Build • Exceptional Energy Efficiency • Precision Engineered

The Smarter Way To Extend Your Home

Modern Steel SIP construction offers a faster, more energy-efficient alternative to traditional building methods, allowing you to create beautiful new living space with less disruption and exceptional long-term performance.

Every extension is precision engineered before arriving on site, helping to reduce build times while delivering outstanding strength, thermal efficiency and quality.

The result is a home extension that's designed not only to look exceptional, but to perform exceptionally for years to come.

Why Choose A Steel SIP Extension?

- ✓ Significantly faster construction
- ✓ Outstanding thermal efficiency
- ✓ Warm in winter, cool in summer
- ✓ Reduced energy consumption
- ✓ Precision engineered for accuracy
- ✓ Strong, durable steel framework
- ✓ Less disruption during construction
- ✓ Designed for modern family living

Planning Permission? You May Not Need It.*

Many homeowners are surprised to learn that a large number of single-storey extensions can be built under Permitted Development Rights, meaning formal planning permission may not be required. While every property is different, this can often save both time and unnecessary delays.

Our experienced team will assess your property, explain your options, and advise whether your project falls under Permitted Development or requires a planning application.

We'll guide you through every step, giving you complete confidence before work begins.

BUILT FASTER	ENERGY EFFICIENT	SAVE ON BILLS	MAY NOT NEED PLANNING PERMISSION*	STRONG & DURABLE
Precision panels mean a dramatically quicker build time	Superior insulation keeps your home warm in winter and cool in summer	High performance insulation helps reduce your energy costs	Many extensions fall under Permitted Development Rights	Steel framed construction with SIP panels built to last
LESS DISRUPTION	EXCELLENT AIR TIGHTNESS	SUSTAINABLE CHOICE	MORE USABLE SPACE	BUILT TO HIGH STANDARDS
Quicker build times mean less mess and minimal disruption to daily life	Reduces drafts and improves comfort all year round	Materials and construction methods designed with the future in mind	Create the extra space your home and family truly need	Fully Building Regulations compliant and completed to the highest standards

*Permitted Development eligibility depends on your property and local authority requirements.

A Complete Turnkey Service

From your initial consultation to the final finishing touches, we manage every aspect of your Steel SIP Extension with professionalism, care and attention to detail.

Our experienced team will guide you through the entire journey, from bespoke design and advice on planning and Building Regulations through to expert installation and project management.

With one dedicated team overseeing your project from start to finish, you can enjoy a seamless, stress-free experience and complete confidence that your new extension will be built to the highest standards.

Ready to Transform Your Home?

Whether you're creating a larger kitchen, a spacious family room or a bright new living area, a Steel SIP Extension offers a modern, efficient way to unlock your home's full potential.
